

### Featured Product Showcase Entry

Control your front door, garage, hotel room, and more with the IMAPorter. Using NFC and Bluetooth technology, the IMAPorter system allows users to enter a pre-determined location with a simple tap of a smartphone. From Airbnb owners and operators to large business corporations. The security of this solution enables a touch-less way to enter the door of your choice. [Read more about it here.](#)

### Technical Update

The NFC Forum recently published the [NFC Money Transfer \(NMT\) Candidate Technical Specification 1.0](#). The NMT Specification defines the functions that enable two NFC Forum Devices to transfer money – such as passing money to an individual or paying a bill in a convenience store. This specification defines Money Transfer (MT) protocols, the corresponding message structures for those protocols, and the NFC Forum Well Known Types used in those messages. This gives payment service providers and consumers the opportunity to take advantage of the simple and secure NFC-based payment solutions already in use worldwide as an alternative to QR code-based solutions. The NMT Specification is published as a Candidate specification allowing all stakeholders to review this document and to provide feedback to the NFC Forum before the adoption of this specification. [The Technical Committee Glossary](#) was also updated and can be downloaded from the NFC Forum public website.

### Developer Tip

Did you know that the NFC Forum Certification Program provides manufacturers with a means of establishing that their products conform to the NFC Forum Technical Specifications? Certification is granted through a top-notch testing process for implementations that meet NFC Forum Device Requirements.

Benefits of certification include shortening the product adoption process, lowering adoption costs, and making product implementations easier for partners to integrate. [Click here](#) to learn more about the NFC Forum Certification Program.

We are excited to share the news that the First Reader Device to be certified is the [Broadcom BCM5802](#), which was recently certified in the ISO 17025 Accredited Test Lab.

### Event Highlights

[Bluetooth Asia - May 23-24, 2019 \(Shenzhen, China\)](#)

The NFC Forum heads to China for Bluetooth Asia! Come meet us on the exhibition floor and learn more about NFC technology and applications.

[AIPA, June 3-4, 2019, \(Jersey City, USA\)](#)

Join NFC Forum and other leading brands for an hour-long lunch workshop focused on a critical question: How can brands motivate consumers to engage with smart packaging? Facilitated by Matthew Bright, the NFC Forum's Retail & Payment SIG Chair, this session will draw from the ideas and experiences of experts in attendance to address: Critical elements of successful (and not-so-successful) deployments; Compelling use cases to encourage engagement; and creative ways brands can educate consumers about smart packaging.

[WEAR Conference, June 19-21, 2019, \(Seattle, USA\)](#)

WEAR 2019 will focus around the theme Synergy of Functionality and Well-Being, exploring the latest on market dynamics & industry innovations, wearable and smart fabric standardization, intellectual property and data collection, textile technology, wearable healthcare and wellness, and more.

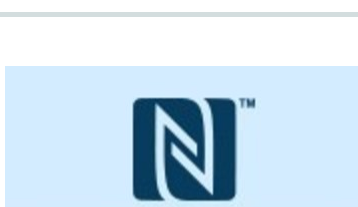

[RFID Journal Live! Retail, June 25-27, 2019, \(Chicago, USA\)](#)

RFID Journal LIVE! Retail, the world's only RFID event dedicated specifically to the retail application. There's no more optimal time and place to capitalize on the opportunities presented by emerging technologies. At RFID Journal LIVE! Retail, you'll gain all the knowledge and connections necessary to make the transition to a blended business model and clear your company's path to stronger sales.
